To PACKARD DISTRIBUTERS AND DEALERS

Subject SPECIAL TOOL PRICES

Gentlemen:

It has just been called to our attention that there has been an error in printing the price list in the tool sheet inserts recently issued.

The price of S. T. 683, Extra Heavy Duty Wheel Puller, illustrated on Page 37E is in error being shown at \$3.25. This price should read \$16.00. Will you kindly mark your book accordingly.

S. T. 683 is an Extra Heavy Duty Wheel Puller made entirely from forgings. It operates on the principle of the wedge and there is no wheel too tight for it to pull. Operating as it does there is no shock or strain put on the wheel bearing as with the ordinary puller, and this feature alone will more than justify it's use.

Very truly yours,

PACKARD MOTOR CAR COMPANY
