

PACKARD

"DUAL" ROAD AND FOG LIGHTS

Piece Number—Single Light, PA-3060

For maximum protection use these lights in pairs. They throw a powerful beam of fog-penetrating light. When your headlights are less effective due to fog, sleet or rain, these fog lights, because of their position and special, convex, green-amber lens, will allow you to drive more safely. They are six and one-half inches in diameter, equipped with special reflectors which produce 143,000 candle-power. The shell is of brass, chrome plated. The attaching bracket is unique in design and will fit practically any bumper bar

Price per pair, installed, \$13.90
