Gentlemen:

We have a small surplus stock of power tire pump equipments which are now being offered at special prices. These are new, unused, gear-driven units that attach to the transmission case where a space is provided for them. The removal of a tire pump hole cover plate is all that is required to fit them in place.

A twelve foot length of air hose and all the necessary attaching parts, as listed in our Service Equipment List No. 17 dated February 17, 1931, are included.

Piece No.	Name	Models	New Suggested List Price		
			Zone 1	Zone 2	Zone 3
176762	Tire pump equipment	726-33-40-45	\$9.17	\$9.62	\$10.42
		826-33-40-45			
		901-2-3-4			

Every owner contemplating a tour in sparsely settled country will find a real need for one of these labor-saving devices.

Yours very truly,

PACKARD MOTOR CAR COMPANY
