Motor troubles frequently are traceable to faulty vacuum tanks. It is not always easy to find the difficulty and, even when located, it is not always good economy to attempt corrections.

Why spend your time and your customer's money on an old, worn-out mechanism when a brand new unit can be installed at so small a cost. We have a surplus stock of new, complete vacuum tank assemblies and will ship, as long as they last, for any model on which this equipment was standard. Every service man should have this information on tap at all times. Your customary parts discount applies.
