Since issuing Savings Bulletin No. 104, offering rear springs 5078 and 178950 at special prices, we have decided to enlarge your field of opportunities. The list below represents additional surplus stock on which special prices have been established. Your usual discount applies.

Individual spring replacements should be made having the same rate of action and load capacity, but very satisfactory service may be obtained by installing them in pairs having the same rate, provided their load capacity is reasonably near that of the original equipment.
