Subject: HEAVY DUTY FANS

The Factory Parts Warehouse has a limited number of heavy duty fans which originally were stocked to fill orders for fans of this type for 21st Series taxicabs, model 2130. This type fan was made available to reduce under-bonnet temperatures and to improve engine cooling on taxicabs which operated mostly in heavy traffic and at low speeds.

These heavy duty fans also may be installed on the models listed below to improve engine cooling at low speeds. These fans are carried under part number 389897.
