Subject: ULTRAMATIC DRIVE FLUID DRAIN PERIOD REVISED - ALL  
MODELS

The Ultramatic Drive fluid drain and refill recommendation recently was increased from 15,000 miles to 25,000 miles.

This revision is retroactive to all Ultramatic units in service; the fluid level checking period, however, is not changed. The level should be checked every 1,000 miles and, if necessary, oil added to maintain the level at the full mark on the dip stick.

The large lubrication posters recently released for shop use show the 25,000 mile fluid change period. This revision also will be included in the 24th Series Owner's Guide when they are reprinted; however, you may wish to inform Owners of this revision when delivering new cars and when servicing earlier models.

Very truly yours,

*J. A. Carr*
