TO: ZONES AND DEALERS

SUBJECT: RADIATOR CORE BOTTOM TANK AND OIL COOLER ASSEMBLY -
23RD SERIES

Government restrictions have curtailed the metals used in radiator cores.

To correct a condition whereby the oil cooler tube has failed in a 23rd Series radiator core, a bottom tank and cooler assembly is now available in limited quantities for service.

Part No. 436145, Radiator Core Bottom Tank and Cooler Assembly, will fit 2301-02-06-13 models.

A competent radiator repair man can install this assembly.

Yours very truly,

J. A. Carr, Manager
Parts and Service Department
