Subject: STORAGE BATTERIES

It has been reported that some difficulty has been experienced in obtaining 12-volt battery warranty adjustments because the local battery distributor did not have the proper type battery in stock.

Both Willard and Auto-Lite can supply an alternate battery which has approximately the same overall dimensions and comparable capacity but with a different negative post location. This battery can be used satisfactorily with the original battery cables.

The battery suppliers have advised their field organization to use the alternate battery if the original equipment type is not available.

Very truly yours,

H. N. Johnson
Assistant Service Manager
