Subject: CHROME PLATE PROTECTIVE COATING - 55TH SERIES

The outside chrome plated parts on all 55th Series cars are now being covered with a protective coating material.

Kerosene, gasoline or naphtha applied to the coating with a cloth will dissolve and remove the coating from the chrome as well as the coating that may be on the painted surfaces near the chrome parts.

**CAUTION:** Extreme care should be exercised when using gasoline or naphtha to prevent fires.

Very truly yours,

H. N. Johnson  
Assistant Service Manager
