

SERVICE LETTER

SOUTH BEND 27, INDIANA

SUBJECT	COWL VENT FRESH AIR INTAKE KIT, LEFT SIDE - 1958 MODEL STUDEBAKER AND PACKARD (EXCEPT HAWK MODELS)	NUMBER	SP-5
		DATE	March 11, 1958

A cowl Vent Fresh Air Intake Kit for installation on the left side of 1958 Model Studebakers and Packards (except Hawk Models) is released for dealer installation. The installation of this kit will substantially increase air flow into the passenger compartment and provide increased compartment cooling during warm weather.

To provide a left interior vent door assembly that matches, in color, the right interior door, dealers must order the Cowl Vent Fresh Air Intake Kit and the left interior vent door separately. The parts required to make the Cowl Vent Kit installation are:

PART NUMBER 1330250 - COWL VENT KIT
(1 required)
PART NUMBER 1326603X210 - DOOR ASSEMBLY - Bluff Grey Metallic
(1 required) 1326603X202 - DOOR ASSEMBLY - Mountain Blue Metallic
1326603X203 - DOOR ASSEMBLY - Park Green Metallic
1326603X218 - DOOR ASSEMBLY - Court Sand
1326603X 41 - DOOR ASSEMBLY - Midnight Black

Installation instructions are packaged with each Cowl Vent Kit. Time required to install the Cowl Vent Fresh Air Intake Kit is 2 hours.

THE COWL VENT FRESH AIR INTAKE KIT CANNOT BE INSTALLED ON CARS EQUIPPED WITH COWL-MOUNTED ELECTRIC POWER ANTENNA!

Dealers may purchase the Cowl Vent Kit and proper left interior vent door assembly by ordering from the Studebaker-Packard Parts and Accessories Division, South Bend, Indiana.

A cowl vent for the left side is expected to start in production on all 1958 Model Studebakers and Packards, except Hawk and Scotsman Models, approximately April 15, 1958.

ROY B. BENDER
