Subject: CHANGE IN BRAKE FRONT CAMSHAFT

TO BE NOTED AND INITIALED BY

Gentlemen:

The Brake Front Camshaft on models 236-243-336-343-443-326-333-426-433 - 526 - 533 with Bendix type brakes, which were originally $1\frac{1}{2}$ " in diameter, have been changed to $1\frac{3}{4}$ " in diameter.

The factory no longer furnishes the $1\frac{1}{2}$ " Camshaft and this change also necessitates the changing of the bracket. Therefore, when ordering, kindly use the latest part numbers covering the new Brake Front Camshaft and Bracket Assembly.

New details are not interchangeable with corresponding details of old design.

A similar change was made in the sixth series, but due to the two-way shock absorbing equipment, we had very few complaints and consequently, we are furnishing detail parts for either the 1½" or the 1¾" design. These are listed in our Service Parts Lists.

Very truly yours,

PACKARD MOTOR CAR COMPANY.
