TO BE NOTED AND INITIALED BY

To PACKARD DISTRIBUTERS AND DEALERS**Subject** PACKARD QUALITY REPLACEMENT GLASS

Gentlemen:

It is of great importance that Packard windshield and body glass be replaced, when necessary, with the same quality glass as used in production.

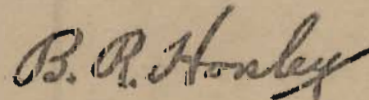

The non-shatterable glass which we use has passed our engineering specifications and laboratory tests, and is procured from the Libbey-Owens-Ford Glass Company who have distributors in almost all principal cities throughout the United States and Canada. They have assured us that their authorized distributors will satisfactorily take care of any replacement glass required by our distributors or dealers.

Some distributors and dealers may find it more convenient to procure their replacement glass locally instead of ordering it from the factory, thereby eliminating transportation delays and possible breakage. This will be entirely satisfactory with us, providing the same quality glass is procured.

We are attaching hereto a list of their distributors and you may order from their distributor nearest to you, or you may order from the Packard factory and we will gladly fulfill your requirements.

Yours very truly,

PACKARD MOTOR CAR COMPANY
