Subject TRANSMISSION CASE COVER BOOT -120

Gentlemen:

A rubber boot has been developed for the dome on the transmission cover of the 120.

This boot encloses the entire dome and extends downward below the rubber mat. It not only improves the appearance of the front compartment, but also takes care of any possible oil leakage around the gear shifter lever. Such oil will remain inside the boot or will be carried down below the level of the mat.

We believe that most customers will be glad to purchase these boots from an appearance standpoint alone. The suggested list price will be \$.40. They should be ordered as follows:

#304204, Transmission Case Cover Boot.

Yours very truly,
PACKARD MOTOR CAR COMPANY
