SERVICE MANUAL

INTRODUCTION

Studebaker-Packard Corporation
Detroit 32, Michigan

INTRODUCTION

This manual is designed to provide the serviceman with complete information on the construction, operation, maintenance and repair of various units of the 55th series Packard vehicles.

The manual is divided into sections each of which is preceded by an index card listing the contents within the section. The pages and the index cards are removable so that revised pages as well as supplementary pages can be inserted if design or manufacturing changes so warrant.

The information contained herein includes step-by-step service and reconditioning procedures with many of the operations clearly illustrated.

Every effort has been expended to make this manual a ready reference book not only for the experienced serviceman but also to cover procedures for the less experienced man. The impact of the value of this manual is through the influence of the information it contains.

Consulting this manual, when information is required, will result in the saving of time, the correct sequence to follow and, to this end, the educational value of the manual is immeasurable.

The value derived from the efforts and research, which produced this ready reference book, is reflected in the results obtained by the mechanic's use of its information in relation to practical shop application. Through such application will the actual realization of the wealth of helpful information this manual contains be actually materialized.

The special service tools shown or referred to in this manual are essential for efficient servicing of Packard vehicles. Service tools with "KMO" or "J" prefixes are available through Kent-Moore Organization, Inc., Detroit 2, Michigan, while the service tools with a "PK" prefix are available through K. R. Wilson, Inc., Arcade, New York.

This manual should be kept readily available for use as a guide and reference book. A thorough understanding and frequent use of the information contained herein will enable the mechanic to properly and efficiently serve Packard owners.

The information, illustrations and specification data contained in this manual are based on the manufacturing information available at the time of compilation of this publication.
